[@konstantinos-zachopoulos](#)

PROFILE

Business Intelligence Analyst specializing in **KPI and performance analytics** for decision-critical environments. Experienced in building **decision-ready dashboards** and **translating complex business data into clear performance narratives** that support prioritization and action, while validating performance metrics. Strong expertise in **SQL and Power BI**, with a focus on KPI logic, data modeling, and performance interpretation across operational and financial contexts. Well suited to internal BI roles requiring **ownership, correctness, and accountability**.

BI Portfolio: www.kzanalytics.com

EXPERIENCE

Senior Performance Analyst | Airbus, Toulouse FR

May 2024 -Present

- Analyzing and validating **operational performance KPIs** used in senior management reviews, identifying deviations, risks, and underlying drivers.
- Designing and maintaining performance dashboards and analytical views used in monthly reviews, focusing on trends, risks, and prioritization.
- Performing data analysis and reconciliation using **SQL (Palantir Foundry)**, Qlik-based assets and analytical tools to ensure metrics are accurate and reliable before publication.
- Translating operational and financial questions into **clear analytical views** that support prioritization and corrective actions.
- Improving analytical usability by clarifying KPI calculations, validating metric logic, and highlighting data limitations or interpretation risks to KPI owners.

Data Ops Lead | rapidbounce, Athens GR

May 2023 -Apr 2024

- Acted as senior individual contributor responsible for **internal BI and performance analytics**, supporting commercial and operational decision-making in a startup environment.
- Built and maintained **analytical dashboards and reporting views in Looker Studio**, focused on revenue drivers, performance trade-offs, and operational outcomes.
- Supported **revenue- and customer-related decision-making**, translating commercial questions into structured analytical views.
- Performed advanced analysis using **SQL (BigQuery)** across revenue, customer, and operational datasets.
- Worked closely with founders and internal teams to translate business questions into **clear, decision-supporting analytical views**.
- Improved data collection and internal reporting processes, contributing to more reliable and reusable analytical outputs.

SKILLS

BI & PERFORMANCE ANALYTICS

Power BI (DAX, Power Query), Looker Studio, KPI definition, performance reporting, metric validation, variance and root-cause analysis

DATA ANALYSIS & MODELING

SQL (PostgreSQL, BigQuery), Data modeling, analytical datasets, reconciliation and accuracy assurance

SUPPORTING TOOLS

Python (analysis),
Excel / Google Sheets
